ARGUS AI ATTENDANCE SYSTEM

Face Registration Photo Guidelines

CRITERIA & BEST PRACTICES FOR FAST & ACCURATE AI FACE RECOGNITION

To register your face successfully, the camera must capture a clear, unobstructed image of your facial features. Please read and follow the criteria below before taking or uploading your registration photo.

1. Look Straight at Camera

Keep your face directly facing the camera at eye level. Do not turn your head left, right, up, or down. Full frontal view is strictly required.

2. Bright & Even Lighting

Face the light source directly. Avoid standing in front of bright windows (backlight), dark rooms, or under harsh top lighting that casts heavy shadows.

3. Neutral Facial Expression

Keep both eyes wide open and mouth closed. Maintain a natural, relaxed expression. Avoid blinking, squinting, laughing, or extreme poses.

4. Distance & Centered Framing

Position yourself **1.5 to 2.5 feet (50 - 75 cm)** from camera. Keep your entire face and top of shoulders inside the green guide box.

5. No Face Obstructions

Remove sunglasses, tinted spectacles, face masks, handkerchiefs, hats, caps, and helmets. Clear eyesight glasses are allowed if there is no glare.

6. Plain Background & Single Face

Stand against a plain, light-colored, uncluttered wall. Ensure **only one person** is in the camera frame. No people or photos in the background.

ACCEPTED / DO'S	REJECTED / DON'TS
[✓] Face looking directly into camera at eye level	[✗] Looking away, side-profile, or head tilted
[✓] Bright, even frontal lighting on both cheeks	[✗] Backlight from behind or shadow on half the face
[✓] Clear view of forehead, eyes, nose, and chin	[✗] Hair falling over eyes, forehead, or cheekbones
[✓] Clear prescription glasses (zero glare on eyes)	[✗] Sunglasses, dark tinted lenses, or colored frames
[✓] Fully uncovered face (mouth & nose visible)	[✗] Wearing mask, scarf, veil, or neck muffler
[✓] Uncovered head & hair clearly visible	[✗] Wearing cap, hat, hoodie, beanie, or helmet
[✓] Crisp, focused image with zero motion blur	[✗] Shaky, blurry, pixelated, or low-resolution image
[✓] Solo subject in frame with plain background	[✗] Multiple people, crowds, or wall posters in view

QUICK 3-STEP REGISTRATION PROCEDURE:

Step 1: Stand in a well-lit indoor area facing the camera.
Step 2: Align your face inside the on-screen oval guide until the border turns green.
Step 3: Hold still for 2 seconds and click **Capture / Register Face**.
